Work Experience

AI & Automation Engineer (Remote / Contract)

- **n8n Workflow Automation:** Built production-grade backend pipelines using n8n to automate manual processes, significantly cutting down execution time and improving cross-platform data efficiency.
- **AI Message Bridge:** Developed a high-performance, lightweight gateway directly connecting Claude LLM API with Slack, reducing response latency without third-party middleware packages.
- **AI Optimization:** Designed optimized Prompt Engineering structures utilizing Claude & Gemini, increasing output accuracy, system safety, and strict alignment with business logic.

Backend Developer | EPAM Systems

Tashkent, Uzbekistan / 2020.01 - 2022.02

- **MSA Migration:** Architected scalable microservices using Node.js, TypeScript, and FastAPI (Python), migrating legacy monoliths to handle high traffic loads.
- **Performance Optimization:** Restructured DB indexing and integrated a Redis caching layer, successfully reducing heavy query loads and boosting API response speed by 25%.
- **System Stability:** Mitigated system memory leaks during high-volume batch jobs and stabilized asynchronous background workers using NestJS Schedule.
